FOREWORD

The data presented in this Fourteenth Annual Statistical Report has been prepared for the Bureau of Mental Health and gives a brief resume of the general census and traffic of patients and inmates of our institutions for the mentally ill and for the mental defective and epileptic.

The Honorable James H. Duff, Governor of the Commonwealth of Pennsylvania inaugurated a broad mental health program in the last session of the legislature which cooperated generously in making the very necessary funds available. A decisive mandate was given the Governor's administration to rehabilitate, modernize and extend the services and facilities of our State Mental Hospitals and Institutions.

The program for reconditioning the older units and for constructing new accomodations is now well under way. With careful surveys and inspections including visitations to neighboring states, and with almost constant rounds of consultations between all the professional officials and personnel involved, plans have been worked out not only for the complete and maximum use of available funds, but also for an over-all long-range program which will bring Pennsylvania to a place of leadership in the field of mental health. The several Bureaus in the Department of Welfare which are intimately concerned with the mental health program have been given full priority of attention so that this vital program entrusted to the Department has received every expedient possible.

I am happy to state that there have been constantly forthcoming

L324504

enthusiastic and aggressive contributions of the best considered thought of each member of our various staffs. It has been our common resolve in our efforts to bring all factors under control in this great field of endeavor to integrate our resources as well as our future proposals in such manner that the mental patient and his early treatment is the common denominator in every consideration.

Although the program in the current biennium seems to emphasize relief and progress in terms of institutional buildings, it should be clearly understood at this time that the philosophy in guiding each new construction and remodeling project, emphasizes function in terms of treatment and activities and not of custody, which is after all incidental. Corollary to this emphasis must be added the theme of teaching and training so that the quality as well as quantity of our personnel may be progressively maintained. These statistics are yet a little too premature to be influenced by the progress we are now making, in our program. The future reports will reflect more favorable trends as the momentum of our present undertaking becomes increasingly felt.

That human values can be salvaged, that the sick person can be given every chance to get well and return to home and society, that the mental health needs of our citizens can be adequately met, are the principles upon which our efforts are dedicated. In this light the statistical report should be interpreted.

Department of Welfare
Charlie R. Barber
Secretary

Polk	2210	3205	145.0
Selinsgrove	711	964	135.6

* No capacity figures are given for Western State Psychiatric Institute and Clinic because of the type and nature of the institution.

BUREAU OF MENTAL HEALTH

These statistics comprise the 14th of an annual series of reports on selected data acquired from the Commonwealth's institutions for the mentally ill and for the mentally defective and epileptic. The material submitted herewith is by no means inclusive of all the possible tabulations but does represent arrangements into standardized tables which may readily be compared with previous annual reports of this Commonwealth and with similar reports of the several states. In the current issue the data on mental patients covers the fiscal year ending May 31, 1948.

Since the U. S. Bureau of Census indicates that nine out of ten mental patients in Pennsylvania are committed to public institutions and since the Commonwealth's public mental facilities for these patients are now all state-owned and state-operated, it may be assumed that these statistics are fairly representative.

Compared to our annual reports of the past several years we find a significant increase in total population and in first admissions for 1948. This all-time high does not necessarily mean an increase in morbidity and in those conditions requiring institutional custody. The more influential factors are the accumulative backlog from the war-time and post-war restrictions, the easing of some of these restrictions, and the continued socio-economic trends that mitigate against the traditional care of the aged and the infirm at home.

Five classifications still comprise the bulk of first admissions, and the breakdown is of interest when one notes the shifts in the type of conditions causing commitment:

	1939	1948
Paresis	10.0%	6.5%
Schizophrenia	23.0	26.9
Manic-Depressive	9.5	6.5
Seniles and Sclerotics	16.5	24.4
Non-Psychotics	8.2	9.9
	67.2%	74.2%

The relative increase in the old age group of patients is also found to be absolute by the fact that first admissions age 60 years or over constituted only 21% in 1939 and is holding rather even at 31% in 1948.

The decline of paresis which is now at an all-time low is interesting. The gradual increase in non-psychotics may indicate a trend toward the use of mental facilities for cases with social implications involving inadequate adjustment without actual mental disorder.

The period covered by this report finds the inauguration of an aggressive program by the Governor's administration for more adequate services and for relief of institutional conditions. Some eighty-two millions of dollars were made available by the 1947 legislature for rehabilitation and expansion of the physical plants. At the close of this period, about 76% of this vast sum has been activated with the full prospects that the entire amount will be committed by the end of the current biennium 1947-1949.

With deferred maintenance commanding priority actual expansion must be relatively modest at first. Each institution is being geared up to eventual capacity and is being rounded out into a well-balanced operating unit to meet the full needs of its allocated district. This means expanding a small facility into a full-fledged institution and rebuilding in various degrees deteriorated portions of an established large institution. However,

at the same time, opportunity for functional design is at hand and emphasis being placed throughout on treatment instead of custody.

The many facets of an over-all state-wide mental health program are in process of integration and a definite momentum has now been initiated which will require serious consideration of a follow-up support at the next legislature. As this wide flung construction develops to completion the mental health program must reach out into the community with the extra-mural hygiene activities. It has become quite obvious that prevention and early treatment is the only answer to the apparent trend of building more and larger mental institutions. In fact, as Dr. George H. Preston, the State of Maryland's Commissioner of Mental Hygiene, has proposed, institutional care and treatment should be considered only as an episode in a complete public mental health program. And a solid basis for all this is the adequate provision for training and research which has been so unfortunately neglected in the past.

We have practically started from the irreducible minimum and future prospects can only be brighter. There still remains that inevitable latent period to endure while time is consumed in building up our accomodations as labor, supplies, and materials are available, and in acquiring the very necessary trained personnel.

Hilding Bengs, M.D.

COMMONWEALTH OF PENNSYLVANIA

FOURTEENTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

CHARLIE R. BARBER

Secretary

1948

Bulletin No. 92 | Penal | Section B

-10

FOREWORD

Section B of the Annual Statistical Report for the period June 1, 1947, to May 31, 1948, contains information relating to the State and County Penal and Correctional Institutions of the Commonwealth of Pennsylvania.

From the following tables and charts prison administrators and public officials may view current trends within the State Institutions and County Prisons, which should prove invaluable in anticipating future requirements.

The progress of rehabilitative training, per capita costs, movement of population, and analysis of types of commitments are all presented in such a manner that trends may be followed readily by comparing this bulletin with those published in prior years.

Department of Welfare
Charlie R. Barber
Secretary

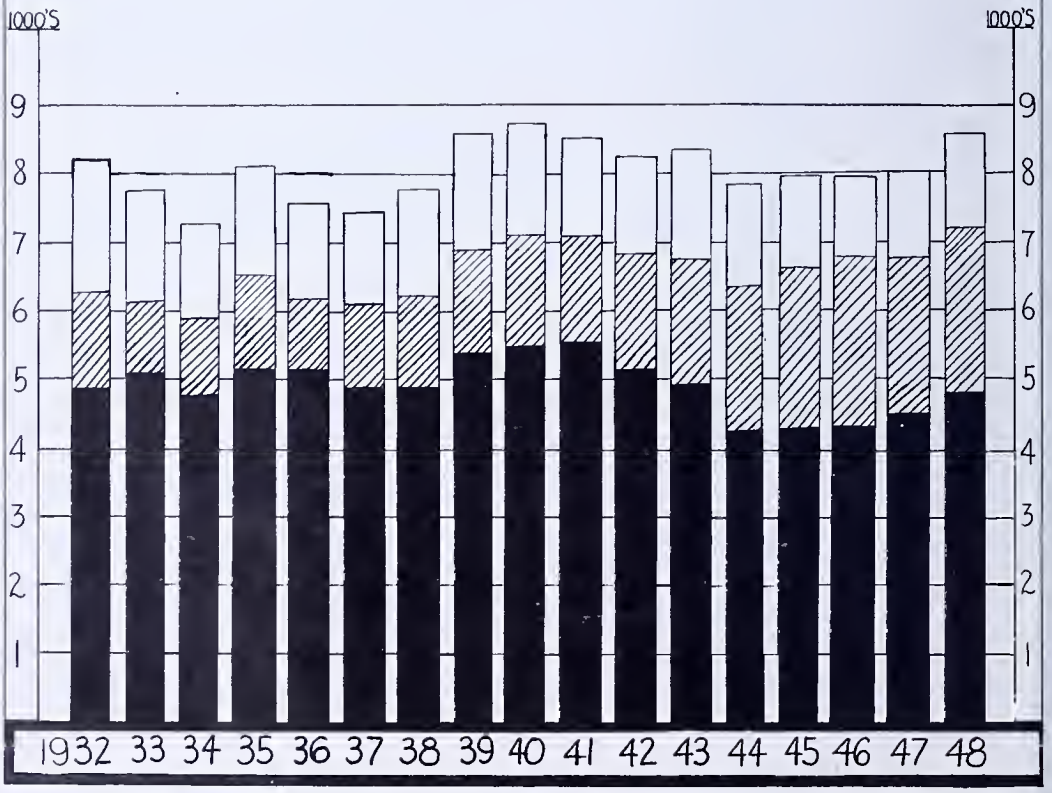
STATE INSTITUTIONS
PENAL
AND
CORRECTIONAL
POPULATION MAY 31
1932 —— 1948



BUREAU OF CORRECTIONS

This Bureau within the Department of Welfare is responsible for the supervision, inspection and regulation of all penal and correctional institutions throughout the Commonwealth of Pennsylvania.

Minimum standards, rules and regulations have been promulgated by the Department of Welfare and approved by the Welfare Commission, relative to the physical, maintenance and administrative policies for all penal and correctional institutions of the state. It is the duty of the Bureau and its field force to examine thoroughly all institutions under our jurisdiction to ascertain that all standards set up by the Department of Welfare are being carried out with special emphasis on security, safety, health and maintenance.

During the year special attention was given to city, borough and township lock-ups. The inspection of these lock-ups discloses the following:

Number of City, Borough and Townshiplock-ups in the Commonwealth of Pennsylvania beginning January 1, 1941 was	515
Reported in good condition	159
Reported in fair condition	187
Reported in poor condition	128
Total number of lock-ups as of May 31, 1948	474
Lock-ups closed due to inspection	41
	515

Approximately 50 per cent of those rated poor do not use their lock-ups often and cannot comply with the recommendations submitted by the Bureau of Corrections and will discontinue the use of their lock-ups and make arrangements to use a nearby approved lock-up or the county prison.

The closing of these lock-ups will relieve the officials in charge of considerable responsible and will also mean quite a saving to the tax payers.

Other institutions which come under the supervision of the Bureau of Corrections are as follows: Eastern State Penitentiary, Philadelphia; New

Eastern State Penitentiary, Graterford; Western State Penitentiary, Pittsburgh; New Western State Penitentiary, Bellefonte; State Industrial Home for Women, Muncy; Pennsylvania Industrial School, Camp Hill; Pennsylvania Institution for Defective Delinquents, Huntingdon; Pennsylvania Training School, Morganza; Allegheny County Workhouse, Blawnox, House of Correction, Philadelphia and 68 county prisons.

The crime problem of the state has been steadily increasing and its prevention and solution are worthy of more careful and educational intelligence.

We of the Bureau of Corrections are hopeful that in the near future the State of Pennsylvania will create a correctional program which will place the Commonwealth in the forefront in the treatment of crime and delinquency.

Department of Welfare

Bureau of Corrections

Fred W. Brady

Director

COMMONWEALTH OF PENNSYLVANIA

FOURTEENTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

CHARLIE R. BARBER

Secretary

1948

Bulletin No. 92 General Section C

-10

The gathering and compiling of statistics are invaluable in the work of the Department of Welfare. They are used by the Administration as well as the General Assembly in working out the budget and appropriation for our Welfare Institutions who are caring for over 52,000 men, women and children. The planning for this large group of people and the proper evaluation of all of the Departmental and Institutional services, relative to budget allotments, operating costs, personnel employment and turnover etc., is readily attained and more accurately administered when guided by accurate statistics.

From these various bulletins and tables one can observe the trends in Institutional population and service rendered. They will show the increasing or decreasing need for the various type of services offered by the Department of Welfare. With this practical information at hand, plans can be layed out for future programs and services to the administration and General Assembly for appropriate action to meet these problems.

We feel that this bulletin will be of value to all who are interested in the planning for the welfare of Pennsylvania citizens and hope that from its contents a better plan can be worked out for the future of Pennsylvania's institutions.

The fourteenth Annual Statistical Report is issued in three sections. The first section deals with Mental Institutions, the second section deals with Penal and Correctional Institutions. In this Bulletin will be found tables of statistics depicting activities of the Bureau of Institutional Management, the Bureau of Community Work and the State Council for the Blind, covering the period from June 1, 1947 to May 31, 1948. The Bureau of Institutional Management serves all State-owned Institutions supervised by the Department of Welfare and also acts in an advisory capacity to State-aided and tax supported institutions. Consequently, its functions are inter-

related with all Bureaus of the Department of Welfare.

The Bureau of Community Work is concerned with problems involving the care of both children and adults. This activity covers both agencies and institutions as well as general hospitals, licensed nursing and convalescent and homes for the aged.

In this bulletin will be found tables concerning laundry activities, food consumption, unit price of food, farm production and utilities. Statistics concerning the different types of services furnished by the ten State-owned Medical and Surgical Hospitals are also included.

Information dealing with commitments of juveniles to institutions and the number of children receiving care away from their own homes appear in separate tables.

In addition, facts supplied by the Council for the Blind, which is an administrative board in the Department of Welfare, appear in this bulletin.

All Bureaus of the Department work closely together and frequently exchange information and services.

Department of Welfare

Charlie R. Barber

Secretary

BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and forty State-owned Institutions for developing and supervising a program providing food, laundry, steam, light, water, sewage disposal, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, lsundry, hospital, farm and engineering service records are issued to institutions.

Dietary

The use of the Basic Ration as a yardstick of an adequate low cost diet has continued. The table showing the ration and the average daily consumption per person per day in fifteen of the mental hospitals and schools for mental defectives shows the variation in the ability of the institutions in meeting these minimum requirements. A slight average increase in food consumption has been accomplished during 1947-48 over that of 1946-47; however, it is still slightly below the requirements.

The food costs for 1947-1948 have steadily increased over that of 1946-1947 making the total raw food increase for the biennium about 30%. Labor costs have increased in a similar proportion. Necessary salary increases, additional employees to inaugurate a straight-shift eight hour day, and the increasing need for a higher ratio of employee as the institutions reach the status of a hospital,are the reasons for the increased labor costs.

The Office of Price Administration controlled prices of commodities until August, 1946, since then beef has increased 100%. Other commodities have increased in a similar ratio as is shown in the table giving the unit prices of type foods.

The production of food such as milk, pork, some beef, eggs and

poultry and vegetables, has helped considerable to feed as adequately as possible on the limited budget available. Institutions with canning facilities have continued their food preservation program. It has also helped to distribute produced foods to a yearly consumption basis rather than a seasonal basis. About 648,060 #10 cans of fruits and vegetables were canned and 71,134 pounds were frozen in 1947; 1946 had 576,020 #10 cans plus 45,143 pounds frozen. This figure includes those processed at the penal and correctional institutions as well as the mental hospital group, but does not include the amounts processed by the Prison Industries for sale to other tax supported institutions.

Farms

At 27 Mental and Penal Institutions land totaling 35,720 acres is controlled. Of this total, 34,607 acres are owned by the Commonwealth and 1,113 acres are leased for institutions. Control of this land provides a degree of isolation highly desirable alike to community and institution. Utilization of land provides wholesome occupation in barns, fields and gardens for approximately 2200 patients or inmates. This patient or inmate occupation is of necessity quite seasonal so that at certain times the number so occupied reaches much higher figures. Approximate patient or inmate occupation in farm enterprises is shown on the table headed "Acreage, Number of Patients Occupied on Farms". The utilization of land is shown on the table headed "Institutional Land-Approximate Use in Acres". Definite plans are developed for the use of all land in order that the maximum contribution may be made to the over-all institutional program. Such plans are developed annually in conference of institutional administrators with farm managers, dietitians, stewards and representatives of the Department of Welfare. Food production has long been an important factor in institutional economy. Indeed, during recent years of scarcity and high prices, institutions would

frequently have lacked essential foods were it not for their own production. In planning land use, priority is given to vegetables and potatoes, since these products have such a large place in the institutional dietary.

Dairy cattle, swine and poultry are maintained at institutions having facilities for handling them. These livestock enterprises contribute part or all the milk, pork and eggs used by the respective institutions. Beef cattle are fattened for institutional use at such institutions as have surplus pasture or roughage above dairy requirements.

Efficiency in production is sought through close attention to management practices, through use of improved crop strains and better bred livestock.

All farm planning is correlated with institutional food needs and optimum patient or inmate occupation.

Field crops to support livestock utilize the tillable acreage not required for vegetables, potatoes and orchards. Land used at institutions is shown on the table headed "Institutional Land--Approximate Use in Acres". It will be noted that land not suited for cultivation is utilized as pasture or woodland. All land management is planned, not only for maximum production but for conservation and development of soil resources.

Efficiency and producted in major field crops is shown on the table headed "Crop Acreage and Total Yield". Vegetable acreage and production for the production season 1947, is shown on the table headed "Vegetable, Acreage and Production". Milk production for the calendar year 1947 is shown by institutions on the table labeled "Institutional Milk Production by Months". Institutional ownership of livestock as of May 31, 1948 is shown on the table headed "Institutional Livestock Census". Livestock production and efficiency for the fiscal year June 1, 1947 to May 31, 1948, is indicated on table headed "Institutional Livestock Production". Paid employment and per capita

per day costs of farm operation at institutions is indicated on the table headed "Agricultural Activity, Paid Employees and Per Capita Per Day Costs". Progress in agricultural efficiency over a nineteen year period is demonstrated by the final table captioned "Agricultural Efficiency, State-owned Institutions".

Laundry

The yearly summary of institutional laundry data gives average population, pounds of soiled goods, employees--paid and others, working cost and gross cost per pound of soiled goods. The population of institutions receiving laundry service, 60,321, is the highest on record. This figure reflects gradual increase in institutional population.

The total pounds of soiled goods, 49,479,821, is also the highest on record and reflects the gradual increase in population.

Washing costs are only slightly higher than in the past. Gross costs, however, .0121 per pound reflect increased salaries and other high costs.

Patients and/or inmates employed in institutional laundries, 1,551 is approximately the same as a year ago. Institutions must continue to depend on inmate or patient help to a large extent. The work opportunity provided is, however, considered of distinct value by institutional administrators.

Laundry Test Bundle

In the table showing Laundry Test Bundle Analysis, a comparison of quality of performance is made between the first five test bundles run during 1935-36 and the 43rd test bundle, run in 1947. Marked over-all improvement in quality is evident. Whiteness retention averaged 5% higher in the last test bundle and for 20 institutions was rated at 100%. In the first five test bundles, no institution had such a rating. Soil removal averaged 26%

higher in the last test bundle, which is more than a half better than average of the first five test bundles.

These test bundle analyses were made at the Ellen H. Richards Institute of the Pennsylvania State College. They constitute a part of the laundry supervisory service arranged through that agency and which services are made available to all State-owned institutions.

Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of physical property. The table indicating Quantities Used and Costs of Furnishing Operating Services covers a volume of items and corresponding costs for basic maintenance materials and utilities. Coal constitutes the largest single item. Coal cost for the year ending May 31, 1948 was approximately 13% above that for 1947. A substantial portion, however, of the added cost is due to higher coal prices.

The increased tonnage in coal is paralleled by increased consumption of electricity, fuel oil, water and, therefore, total costs. The overall expenditures are about 15% above those of a year ago.

Electricity purchased is 29% above that for the year 1947 with 17% higher cost. This increase is accounted for by about 30% additional load demand in new construction and the remainder to purchase electricity rather than replace existing generating equipment.

Hospital Service

Analysis of Hospital Service at State-owned Medical and Surgical Hospitals are shown in the following tables:

Patients, Type of Service and Number
Laboratory Analysis and X-Ray Examinations, Type and Number
Clinics, Type and Attendance

The average daily population of the 10 Medical and Surgical Hospitals was 1208, a slight decrease over the previous year.

The table relating to Patients, Types of Service and Number, shows that there were 43,489 patients admitted in comparison to 43,503 last year.

The table on Laboratory Analysis and X-Ray Examinations reveals a total of 467,165 laboratory examinations or 10.7 tests per patient. This number represents 36,691 more examinations than a year ago. There were 1765 Electrocardiograms reported this year in comparison to 1103 last year. Similarly, the number of blood transfusions and the administration of blood plasma shows an increase of 540 and 323 respectively.

There was a total of 53,466 X-Ray examinations reported this year, an increase of 4,255 over the previous year. Also, the number of X-Ray Therapy treatments reported was 2,894, compared to 2,026 a year ago.

As will be noted in the table on clinic attendance, the number of visits was 48,742,an increase of 2,336 over last year.

Nursing Education

In the table under Nursing Education in State-owned Hospitals, it will be noted that a total of 143 students, an increase of 17, completed the 3 year course in Nursing in the 4 hospitals conducting schools.

Inasmuch as there have been fewer students in Pennsylvania's Nursing Schools, there has been a decrease of 81 in the number of students receiving Psychiatric Nursing Affiliation in the State Mental Hospitals. However, the number of Nursing Schools represented in these affiliations has increased by 2 over the previous year. The Torrance State Hospital established an approved affiliate program December 30, 1947 with a representation of 2 Nursing Schools in their affiliate group of students.

The Nursing Consultant of the American Psychiatric Association surveyed the affiliate program in 3 State Mental Hospitals. Two affiliate

Schools were accredited during the year and 5 previously by this Organization.

Aiming to increase the quality and quantity of professional nursing service in Mental Hospitals, the Department of Welfare on December 31, 1946 established 4 Fellowships per year to outstanding graduate nurses from Mayview, Warren, Torrance and Woodville for advanced study in Psychiatric Nursing at the University of Pittsburgh and Western State Psychiatric Institute and Clinic. A nurse employee of the Warren State Hospital took advantage of this offer and matriculated at the University of Pittsburgh for one year's study September 1947.

As noted in the table, the Senior Cadet Program has been continued in 3 State Mental Hospitals. This program will be concluded when the presently employed Senior Cadets complete their course of training by September 1948.

The Harrisburg State Hospital has maintained its course for licensed attendants. The number of students completing the course shows a slight increase.

BUREAU OF COMMUNITY WORK

The program of the Bureau of Community Work has been greatly influenced by the war and the reconversions that followed. The rapid movement of population and the reshifting of same, has brought about many new problems for both the young and the aged. One of which has been increased demand for hospital facilities and accomodations for the care of aged, senile, chronic and convalescent men and women. Hospitals which receive State-aid are mainly general in character and the available 29,000 beds in the 171 hospitals in this group are needed for patients who definitely require the facilities and skill of medical and surgical care allowing no beds for the chronically ill.

The supervision of institutions caring for the aged and infirm is limited, as it includes only those which receive State-aid, County Homes, and approximately 300 licensed homes operating for profit.

A similar post-war confronts the Child Divisions. Some new problems are those of Repatriated Children and War Orphans being returned to or sent from Europe. Many of these children become the responsibility of these Divisions. A new group that is ever increasing are the children covered by Old Age and Survivors Insurance whose homes have been broken, and they are placed in foster homes or institutions. Some old problems are the dependent and neglected children from broken homes due to desertion, separation and divorce and these children must receive adequate care. It is from this group that our ever increasing institution population draws its greatest number, at first as delinquent and then as criminals or else as mental cases for our mental hospitals.

In our last report we had well over 40,000 children being cared for away from their own homes. One wonders how many of these children who have been neglected in the past, appear in our present State institution popu-

lation of 52,500 simply because we had nothing to offer them on the local level, which would care for them and prevent the problem of crime or mental breakdown. The old saying "An ounce of prevention is worth a pound of cure" certainly is true when we deal with children who are in need of good care.

The Rural Child Welfare program with its Tri-County Child Guidance Clinic and the Family and Child Welfare program are attempting to help to meet these problems as best they can, under limited conditions. At present the field staff is trying to supervise, inspect and build up standards for over 400 agencies, institutions and organizations caring for over 40,000 children.

The Division of Research and Statistics is also located in the Bureau of Community Work and collects facts and figures. It arranges and analyzes these facts for administrative and research purposes. Intelligent decisions and plans for the future must be based on a knowledge of actual conditions. This Division provides such information through: (1) Routine Statistics (2) Special Studies (3) Information Service.

The work of compiling this report was performed by the Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson. The organization and presentation of the material resulted from conferences and advice from the two Bureaus.

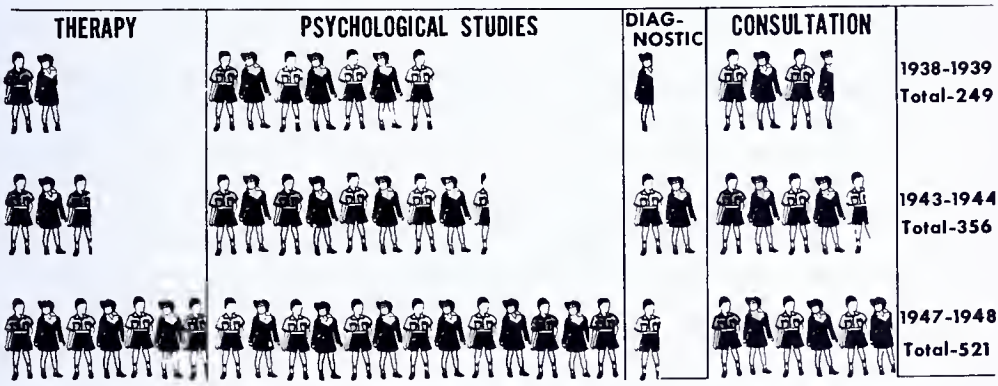
TRI-COUNTY CHILD GUIDANCE CENTER

The Tri-County Child Guidance Center, a Unit within the Rural Child Welfare Division, provides child guidance clinic services of therapy, psychological and diagnostic studies, and consultation for children, parents and for professional persons working with children. These services are available to any child and his parents, living in any county in Pennsylvania where there is no other child guidance service.

NUMBER OF UNDUPLICATED CHILDREN RECEIVING SERVICES

IN FIRST SIXTH AND TENTH YEARS



EACH FIGURE REPRESENTS 20 CHILDREN

Service to 521 children in 1947, as shown above, was given through 3,077 interviews with children and parents,an increase of 129% over the number of interviews in 1938, the Center's first year. The number of therapy cases increased 262% over 1938 and 127% since 1943, showing the increasing emphasis upon this service by the Center and greater understanding and use of it by the community.

COUNCIL FOR THE BLIND

During this year, with a maximum staff of 83 and a minimum of 67 clerical and professional personnel in the Central Office and eight Dietrict Offices, we were able to render service to 15,224 visually handicapped and blind Pennsylvanians at a cost of $391,601.54. Servicee were rendered in all of the 67 counties of the Commonwealth. The youngest client receiving tangible eervice was age 4 weeks, whereas the eldest was past 91 years of age. The annual minimum expenditure on any one client wae $1.00, the maximum $1,458.44. The per capita coet averaged $25.06 for the year.

The operation of 53 vending stands was supervised by the Council. Loans aggregating $3,565 were made to three blind persons from the Employment Revolving Fund. One business venture closed resulting in the loss of $1,375 and one other concession stand was temporarily closed pending reeumption of normal operation in the factory where the etand is located.

A breakdown of section per capita cost for services rendered follows:

General Remedial Eye Care	$14.66
Clinical Remedial Eye Care	1.98
Home Teaching	23.00
Rehabilitation	263.44

Department of Welfare

Council for the Blind
